

**BENSON•HILL**  
BIOSYSTEMS™

[Send Resume Here](#)

## Research Scientist, Trait Discovery

[Creve Coeur, MO](#) • Molecular Biology

### Description

Benson Hill Biosystems empowers innovators to unlock the global genetic potential of plants benefiting people and our planet. We are building the future of agricultural genomics and looking for talented and passionate individuals who will help us drive our vision. Our core values will inspire you to be bold, innovate through collaboration, work hard and smart, and have fun while doing so!

We are actively seeking a **Research Scientist** to join our Molecular Technology team!

### *You'll make an impact by:*

- Developing large scale experiments for generating genotype/phenotype data sets
- Leveraging modern data analytics to identify targets for genome editing
- Manipulating plant metabolism to improve quality, taste, and flavor

### Requirements

#### *You're good at:*

- Analyzing complex data sets
- Working in a fast-paced and collaborative environment
- Collaborating with data scientists and software engineers
- Finding creative solutions to leverage data in new ways
- Multitasking and taking initiative on new projects

#### *You have:*

- PhD in plant biology, biochemistry, genetics or related discipline
- 5-10 years hands-on experience in a trait discovery setting
- Strong technical knowledge of plant metabolism, genetics, and data science
- Previous experience with plant trait discovery from genotype-phenotype relationships
- Background in applied bioinformatics and genomics
- Experience in an industrial agriculture biotechnology setting

#### *We have:*

- A flexible PTO program with a focus on work/life balance
- Competitive medical benefits and retirement savings plan
- *FREE* Dental Coverage
- Education reimbursement
- *PAID* parental leave
- *And more...*
