Senior Research Associate, Protein Biochemistry

[Creve Coeur, MO](#) • Biochemistry

Description

Benson Hill Biosystems empowers innovators to unlock the global genetic potential of plants benefiting people and our planet. We are building the future of agricultural genomics and looking for talented and passionate individuals who will help us drive our vision. Our core values will inspire you to be bold, innovate through collaboration, work hard and smart, and have fun while doing so!

We are actively seeking a **Senior Research Associate, Protein Biochemistry** to join our Biochemistry team. This role will be responsible for conducting activities related to protein expression, purification, detection, characterization and assay development. The Senior Research Associate will be a key member of our Research and Development team, and will work in a fast-paced, collaborative, start-up company environment. You will work closely with an interdisciplinary team across multiple locations.

You'll make an impact by:

- Working on protein expression of recombinant proteins in heterologous systems
- Focusing on protein isolation and purification utilizing chromatography
- Through protein extraction, detection, isolation and characterization in plant tissues
- Communicating results and research progress to management and team members
- Maintaining detailed and organized records of project data and other materials as needed
- Contributing to scientific discussions and presenting outcomes to colleagues

Requirements

You have:

- PhD or MS with 2-5 years of lab experience in biochemistry, chemistry, molecular biology or a related discipline
- Strong verbal and written communication skills
- Ability to work in a fast paced and collaborative environment
- Strong problem-solving skills and the ability to multi-task

We have:

- A flexible PTO program with a focus on work/life balance
- Competitive medical benefits and retirement savings plan
- **FREE** Dental Coverage
- Education reimbursement
- **PAID** parental leave
- And more...
