Research Associate- Trait Delivery

[Creve Coeur, MO](#) • Trait Delivery

Description

Benson Hill Biosystems empowers innovators to unlock the global genetic potential of plants benefiting people and our planet. We are building the future of agricultural genomics and looking for talented and passionate individuals who will help us drive our vision. Our core values will inspire you to be bold, innovate through collaboration, work hard and smart, and have fun while doing so!

We are actively seeking a ***Research Associate*** to join our Trait Delivery team to support the growth of Benson Hill.

You'll make an impact by:

- Exploring leads from our trait prediction engine, CropOS™, in our fast-paced Trait Discovery pipeline
- Advancing traits and product concepts through our Product Development pipelines
- Engaging in our ground-breaking Genome Editing pipelines using BHB's CRISPR 2.0 and 3.0 nucleases
- Supporting media production, explant preparation and cell culture activities across ALL pipelines
- Sustaining operational excellence in pipeline delivery within the Transformation team and across other company functions

You're good at:

- Preparing buffers, solutions and media, and the practice of aseptic technique
- Following protocols and standard operating procedures, and maintaining detailed and organized records
- Problem solving and troubleshooting
- Working independently and as part of a team
- Plant tissue culture and/or transformation

Requirements

You have:

- Associates or BS in molecular biology, biotechnology, plant biology or related discipline
- Previous experience working in a lab setting
- Basic understanding of plant transformation methods
- Experience in an industrial agriculture biotechnology setting

We have:

- A flexible PTO program with a focus on work/life balance
- Competitive medical benefits and retirement savings plan
- **FREE** Dental and Vision Coverage
- Education reimbursement
- **PAID** parental leave
- And more....
