Biotechnology Research Analyst

[Creve Coeur, MO](#) • Strategy/Business Analytics

Description

Benson Hill Biosystems empowers innovators to unlock the global genetic potential of plants benefiting people and our planet. We are building the future of agricultural genomics and looking for talented and passionate individuals who will help us drive our vision. Our core values will inspire you to be bold, innovate through collaboration, work hard and smart, and have fun while doing so!

We are actively seeking a **Biotechnology Research Analyst** to join our growing team. The ideal candidate is a curious individual, who loves learning and exploring new technical areas and problems, can work with others well, and is a creative problem solver.

How you will make an impact:

The person is responsible for performing research activities, which includes studying journals, collaborating with R&D teams, and developing creative solutions to technical problems in support of company's business and corporate development efforts. The ideal candidate is a curious individual, who loves learning and exploring new technical areas and problems, can work with others well, and is a creative problem solver.

Requirements

You're good at:

- Performing research activities into the relevant technical areas, guided by company's strategic imperatives and business priorities
- Collaborating with relevant R&D team to explore potential solutions, and/or gather their input on proposed solutions
- Completing written report which includes summary of finding, conclusions and recommendations
- Identifying and arranging consulting engagements with relevant SME's when appropriate

You have:

- Undergraduate degree in biology, biotechnology, chemistry, biochemistry, or chemical engineering required
- Graduate degree in the above majors is preferred
- MBA degree is desired
- Understanding of microbial and/or plant biology is required
- Superior analytics and problem-solving skills
- Experience managing multiple projects and priorities
- Ability to work well with others
- 2+ years' experience in the microbial or ag biotech preferred
- Passion for technology and innovation, and can demonstrate creative problem-solving skills to solve complex problems

We have:

- A flexible PTO program with a focus on work/life balance
- Competitive medical benefits and retirement savings plan
- **FREE** Dental and Vision Coverage
- Education reimbursement
- **PAID** parental leave
- And more...
